

Breeding Depth & Quality in Allendale Dubbo Team

The Allendale team of 3 outstanding bulls and 1 very classy young heifer for the 2010 Poll Hereford National Show & Sale at Dubbo are displaying all the quality and depth that one expects from this industry leading stud.

The 49th Annual Dubbo National Poll Hereford Show & Sale is being held on Monday 7th & Tuesday 8th June 2010 at the Dubbo Showground. Allendale has had a lot of success at this event over an extensive period of time with numerous championships and top prices to their credit.

Principals Alastair and Jayne Day are very pleased with the quality of the cattle they are offering this year. Their 3 bulls are not only visually very appealing, displaying great breed type, carcass quality, balance and mobility, but they also have wonderful depth of breeding, an indicator of the ability to duplicate their qualities in their progeny. All 3 have been used successfully in the Allendale breeding program.

For any stud wishing to introduce some elite female genetics, the young Allendale heifer is also well worth looking at. She comes in at lot 131 and offers a combination of proven Allendale breeding on the dam side and outcross genetics on the sire side. She is the first progeny of Debarry Calgary; a bull that Alastair Day says is breeding very well at Allendale.

Photos & breeding details of the 3 sale bulls are listed here:
