**SALE VENUE is situated 8kms south of Bordertown on the Naracoorte Road.**

## **Buyers Information**

### **Inspection**

All cattle will be available for inspection from 11.00am on the morning of the Sale, however inspection can be arranged before hand by appointment.

### **Luncheon**

Will be available on the property.

### **Delivery**

While every care will be taken, no responsibility can be accepted whilst awaiting delivery.

### **Transfers**

Please indicate on the Buyers Instruction Slip if a transfer is required.

### **Health**

All cattle are officially government confirmed as TB free and Brucellosis free. The property has a status of MN2 for Bovine Johnes Disease, Certificate No. S117 and S447. All sale cattle treated with 7 in 1 (booster due Autumn 2013). All sale cattle treated with Dectomax, January 2013. All sale bulls ear notch tested as NOT persistently infected with the BVDV virus. All bulls have been vaccinated with Pestiguard and Vibrovax.

### **Interstate Purchasers**

The Vendor agrees to hold any stock for interstate buyers until any necessary tests have been completed. Expenses incurred payable by the Purchasers. Should any cattle react, the sale will be cancelled.

### **Accommodation and Transport**

The Auctioneers will be pleased to arrange accommodation in Adelaide or Bordertown. Interstate Purchasers can be met at rail or airway terminals.

### **Buying Orders**

The Auctioneer's Stud Stock staff are well acquainted with the herd. Buying orders will be diligently executed by officers experienced in stud beef cattle practice.

### **Insurance**

Can be arranged for transit and/or periods up to twelve (12) months cover.

### **Rebate**

A rebate of four percent (4%) will be allowed by the Vendors to Interstate Agents (other than interstate representatives of Selling Agents) and South Australian Associated Agents on any purchase they influence, provided that they advise the Selling Agent in writing and make settlement giving the names of the Purchasers not later than twelve (12) hours prior to the sale.

### **BUYER'S INSTRUCTION SLIP - see Page 68**

+13	+1.5	+39	+2.7	+0.2	+0.2	+0.7	+0.1	EU	+\$75

# Breedplan Explanation

EBV's are provided for the following traits...

<b>CE DIR</b>	Calving Ease Direct. Indicates how this animal influences the birth of its progeny. Positive EBV's indicate easier calving.
<b>CE DTRS</b>	Calving Ease Daughters. Indicates how well the animal produces daughters that have easier calving.
<b>GL</b>	Lower Gestation Length EBV's indicate easier calving and increased growth after birth.
<b>SS</b>	Scrotal size is an indicator of male fertility in regards to semen quality and quantity. SS is also positively associated with female fertility.
<b>Birth Weight</b>	The lower the birthweight EBV, the lighter is the birthweight potential of the progeny.
<b>Genetic Milk</b>	Reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.
<b>200 Day Weight</b>	Indicates the relative weight advantage of a sire at 8-10 months of age.
<b>400 Day Weight</b>	Indicates the relative weight advantage of a sire at yearling age.
<b>600 Day Weight</b>	The best single estimate of an animals genetic merit for growth beyond yearling age.
<b>MWT</b>	Mature Cow Weight is an estimate of the genetic difference in cow weight at 5 years of age.
<b>CWT</b>	Estimates the genetic difference in carcass weight and is adjusted to 650 days of age.
<b>Fat Depth</b>	Bulls with negative (-) EBV's for this trait are expected to produce relatively leaner progeny than bulls with positive (+) EBV's.
<b>EMA</b>	Bulls with positive (+) EBV's for this trait are expected to produce more muscular progeny than bulls with negative (-) EBV's.
<b>Retail Beef Yield</b>	Bulls with larger EBV's are expected to produce progeny with higher yielding carcasses.
<b>Intramuscular Fat %</b>	Positive EBV's indicate likelihood of more intramuscular fat.
<b>Accuracies</b>	The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.
<b>Selection Indexes</b>	An index ranks an animal for single production goal - profit. They take the hard work out of knowing how much emphasis to give each of the available growth, maternal, carcass and fertility EBV's when selecting parent animals. An index is a composite EBV of traits best suited to a particular production system and target market.
<b>Supermarket Index</b>	Targeting the domestic supermarket trade. Steers are either finished on grass or grain (eg 50-70 days). Steers are assumed marketed at 450kg live weight (250kg HSCW and 12mm P8 fat depth) at 17 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.
<b>Grass Fed</b>	Targeting pastured finished steers. Steers are assumed marketed at 600kg live weight (330kg HSCW and 8mm P8 fat depth) at 23 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.
<b>Grain Fed</b>	Targeting pastured grown steers with a 125 day feedlot finishing period for the grain fed markets. Steers are assumed marketed at 600kg live weight (330kg HSCW and 20mm P8 fat) at 20 months of age. Daughters are retained for breeding. There is a significant premium if steers reach a marbling score of 2 or greater.
<b>EU Index</b>	Targeting pastured finished steers for the EU market. Steers are assumed marketed at 620kg live weight (340kg HSCW and 14mm P8 fat depth) at 24 months of age. Daughters are retained for breeding. There is no marbling requirement.

# We're here when you need us.

**The business of farming is not for everyone.  
But like you that's the business we're in.**

With 170 years experience, Elders has the livestock knowledge to support your business. We market over 2.3 million cattle and 13.5 million sheep each year. But there's so much more we can offer. Our specialist animal health services and exclusive ELMS protocols improve the health, weight and quality of your cattle and sheep, whether they're on the farm, in transit or in the yard. And through traditional or online auctions, forward contracts or direct to processor, we ensure more options for buyers and sellers. So, when you're looking for the best livestock partner, we're here when you need us.

## **ATTENTION BUYERS!**

Days Whiteface and Allendale aim to maximise the reproductive integrity and health of their stud stock by adopting a vaccination programme to prevent against reproductive diseases.

Each bulls has had the following:

- Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- Vaccinated against BVDV to ensure they are protected to the effects of this infection
- Vaccinated against Leptospirosis, a potential reproductive and OH&S risk for cattle handlers
- Vaccinated against Vibriosis, a sexually transmitted cattle disease
- Given 2 vaccinations to ensure they have immunity established prior to leaving these premises

You can be confident that every step has been taken by Days Whiteface and Allendale to ensure that these animals presented for sale will not introduce preventable reproductive diseases into your herd.
